A HIGHLY ABSORBENT POLYURETHANE FOAM DRESSING

Lyfoam® Max is a highly absorbent dressing. It consists of a polyurethane foam and a moisture proof backing film with high permeability to allow for effective exudate management of moderate to highly exuding wounds.

Hydrophilic polyurethane foam
- High absorbency and fluid retention capacity
- May be used under compression
- Soft, conformable and easy to apply and remove

Polyurethane backing film
- Moisture vapor permeable
- Moisture Proof
- Provides bacterial and viral barrier
How to use Lyofoam® Max

Clean the wound area and select the appropriate size of Lyofoam® Max. The dressing should overlap the wound margin by about 2 cm.

Place the foam side directly onto the wound surface, with the shiny side of the dressing facing up.

Secure Lyofoam® Max with an appropriate bandage such as Tubifast®, Tubigrip® or a fixation tape such as Mefix®.

Key benefits of Lyofoam® Max

- High absorbency and fluid retention capacity
- Reduced risk of maceration, less potential for leakage and longer wear-time
- Moisture proof backing film acts as a barrier to bacteria and virus penetration
- Works under compression
- Easy to apply and remove
- Soft and conformable and provides comfort to patients
- Non-sensitizing
- Wide range of sizes available for different wound types

Areas of use

Lyofoam® Max is designed for the management of moderate to heavily exuding wounds such as leg ulcers and pressure ulcers.

Through an excellent exudate management, Lyofoam® Max creates a moist wound environment optimal for healing.

Frequency of change

Lyofoam® Max may be left in place for several days depending on the nature and condition of the wound and the level of exudate.
