

Epaderm Cream - recommended by doctors for the management of dry skin conditions, eczema and psoriasis.

Epaderm Cream is an emollient formulated with clinically proven ingredients that moisturise and soften the skin. Emollients are especially effective if applied immediately after washing or swimming. More at www.epaderm.com

Instructions for use: Always wash your hands thoroughly before applying Epaderm Cream. Depress pump head repeatedly until cream is dispensed.

Can be used as follows:

Emollient: Apply liberally to the affected area and massage well into the skin. Use as often as required or as directed by your health care professional.

Skin cleanser: Use as required when washing or in the shower.

Precautions: Do not use Epaderm Cream on patient and/or user with known hypersensitivity to the ingoing materials/ components of the product. If your condition worsens or you experience any undesirable effects, stop using Epaderm Cream and discuss with your health care professional.

For external use only. Avoid contact with the eyes.

Do not use if the seal is broken or after the expiry date.

Warning: Do not smoke or go near naked flames – risk of severe burns. Fabric (clothing, bedding, dressings etc) that has been in contact with this product burns more easily and is a serious fire hazard. Washing clothing and bedding may reduce product build-up but not totally remove it.

Ingredients: Yellow Soft Paraffin BP., Liquid Paraffin Ph. Eur., Cetomacrogol Emulsifying Wax BP., (contains Cetostearyl Alcohol and Macrogol Cetostearyl Ether 22), Chlorocresol, Glycerine BP., Purified Water EP.

Storage: Store below 25°C in a dry place. Keep out of the reach of children. Disposal should be handled according to local environmental procedures.
